OUR LUMBER GRADES

- Supreme :** This grade meets 1&2 grade structural standards while being subject to rigorous wane restrictions. This product is especially appreciated by building material center end-users.
- MSR :** Meant to be used in engineered applications requiring constant structural resistance, each piece is individually rated in order to guarantee performance. This product is used, among other applications, by truss, glue-laminated beam and I-joist manufacturers.
- 1&2 :** This quality is the core of our production and is particularly aimed at the construction industry.
- Stud :** Designed for vertical applications, this product is used mainly in wall construction. Our stud can be precision end trimmed as per specific customer requirements.
- Overseas export :** Matériaux Blanchet has the capacity to adjust its production to the requirements of various overseas customers. Furthermore, we meet the most demanding phytosanitary regulations.
- J-Grade :** Specifically designed for very demanding Japanese specifications, this product is the best grade produced by Matériaux Blanchet.
